INTRODUCTION TO **THE RESEARCH**

Welcome to the 8th annual State of B2B Content Consumption and Demand Report, updated for Content Marketing World 2024.

Recognized with the 2024 Content Marketing Award for Best Annual Report, this report stands apart by relying on real-world B2B actions—not assumptions or surveys. It is grounded in insights from 6.2 million first-party content registrations, revealing the true priorities of B2B buyers.

In this edition, you'll discover:

- Key shifts in content consumption that highlight emerging priorities
- The ongoing importance of addressing the Consumption Gap
- How eBooks, Case Studies, and Research Reports continue to drive demand
- Why Webinars and interactive formats are stronger indicators of buyer intent

This special edition, led by Content Marketing World experts and packed with fresh takeaways, equips you to better understand B2B engagement. Moving into 2025, let's focus on data-driven strategies, AI's growing role, and audience-first approaches.

We look forward to your insights—join the conversation using #ImaDataMarketer.

Cheers,

David Fortino

Chief Strategy Officer, NetLine

2024 REPORT HIGHLIGHTS

WHAT THE PROS ARE SAYING

I'm not a shortcut kind of person (at least when it comes to marketing)... but NetLine's new report gives you the cheat codes for B2B marketing.

Growth. Brand-building. AI. Gated content. Buyer intent data. They've got you covered with the trends you need. Just add in your own creativity and relentless empathy and you will absolutely thrive in 2025. (And you'll rhyme too.)

ANN HANDLEY | CHIEF CONTENT OFFICER | MARKETINGPROFS

There's always been a great debate within B2B as to whether we want an engaged audience or a ready to buy audience. NetLine's report showcases you must have both.

High intent buyers consume more content, even if in a shorter time span. To optimize your buyer's journey, focus on how to move decision-makers through a targeted buyer's journey — focusing on 2+ high-value content activations.

AMY HIGGINS | DIRECTOR, CONTENT STRATEGY | CLOUDFLARE

Contacting a prospect the same day they downloaded or requested your content? The Consumption Gap tells us they haven't opened it yet.

Try this instead: observe the subsequent actions that they and their colleagues take with your content. Reach out to them when the intent signals indicate they're further along the sales cycle.

DENNIS SHIAO | FOUNDER | ATTENTION RETENTION, LLC

NetLine's 2024 Report points to content strategies that center on value, depth and differentiation instead of transactional attention.

The most striking thing in that approach is the return of gated content. In a B2B world, marketers worry that AI-enabled search will commoditize their thought leadership. Deciding the balance of where, which and how to create exclusivity of access to thought leadership is becoming a renewed core of B2B content marketing.

ROBERT ROSE | CHIEF STRATEGY OFFICER | CMI/THE CONTENT ADVISORY

We're past the point of waiting to see if AI is here to stay. It's time to get serious and figure out how to integrate ethically in a way that will have the greatest impact.

We must be open to new ideas, use cases, and solutions to find better ways to do our work.

BRIAN PIPER | DIR. OF CONTENT STRATEGY & ASSESSMENT | UNIVERSITY OF ROCHESTER

Marketers must prioritize audience-first strategies over format-first approaches to truly engage their audience.

By understanding who they're targeting and the content's purpose, marketers can leverage the insights found in NetLine's 2024 report to select the best format to deliver their message with maximum impact.

CATHY MCKNIGHT | CHIEF PROBLEM SOLVER, VP STRATEGY & CONSULTING | THE CONTENT ADVISORY

EXECUTIVE SUMMARY

- Despite the growing push for ungated content from marketers, user demand for gated B2B content rose 14.3% YOY—up 77% since 2019.
- While professionals requested historic levels of content, time to consume slowed by 2.5 hours, widening The Consumption Gap by 8.8% YOY.
- In a year of economic distress and uncertainty, buyers stated they were 5.3% more likely to make investments within the next 12 months compared to 2022.
- 35.2% of professionals expected to make a purchase decision within the next 12 months.
- C-Level consumption represented 12.7% of audience demand, growing 7.9% YOY.
- eBooks remain the most popular content format for B2B professionals, representing 39.5% of all demand—with registrations increasing 34.5%.
- Compared to 2022, users requesting Case Studies were 78.5% more likely to make a purchase decision in the next 12 months.
- Webinars saw a 7.6% YOY increase in registrations; On-Demand Webinars were the eighth most popular format of 2023, growing 56.7%.
- Demand for AI-related content skyrocketed 5.5x YOY.

APPLYING THE LEARNINGS **FROM THIS REPORT**

You're busy and we respect your time.

Assuming you're looking to build your pipeline and accelerate sales outcomes in 2024, here's what you need to know from this year's report.

EMBRACE THE GATE.

77% growth since 2019 proves users are not averse to sharing their information in exchange for high-quality content. Gated content = great first-party sourced intent signals.

B2B PROFESSIONALS NEED TIME TO CONSUME.

The Consumption Gap widened to 31.2 hours in 2023. If you're not giving people at least two days to consume the content they've requested before you follow up, you're not going to be successful.

IF YOU'RE LOOKING TO BUILD AWARENESS, CREATE EBOOKS.

There is nothing more appealing to professionals at the top of the funnel. Users are 3x more likely to request an eBook than the second most popular format (Guides).

THE IMPACT OF AI IS JUST BEGINNING.

Total demand for AI-related content jumped 5.5x in 2023 and seems to be following a similar trajectory for 2024.

THE C-SUITE LOVES SIMPLE CONTENT.

Executives consume a lot of content, but it needs to be easily digestible. 53.9% of their consumption came in the form of eBooks, Cheat Sheets, Book Summaries, and Tips and Tricks Guides.

CASE STUDIES ARE LINKED TO PURCHASE DECISIONS.

In 2023, compared to 2022, users requesting Case Studies were 78.5% more likely to make a purchase within the next 12 months.

DON'T IGNORE INTENT.

Third-party cookies are going away. Leveraging buyer-level intent data is your best bet to knowing precisely *who* your prospects are.

CONTENT CONSUMPTION **GREW 14.3% YOY**

NetLine delivered 6.2 million fully-permitted, first-party leads in 2023.

That's a 14.3% YOY increase in total registrations.

Since 2019, NetLine has recorded a 77% increase in overall demand. Users have given no indication that their behaviors will change anytime soon.

THE PROGRESSION OF B2B CONTENT DEMAND

THE CONSUMPTION GAP

The Consumption Gap is the time between when content is requested and the moment it's opened for consumption.

This past year, it widened, with the time to consume increasing from 28.7 hours to 31.2.

THE EVOLUTION OF THE CONSUMPTION GAP

ON AVERAGE, PROFESSIONALS TOOK

2.5 HOURS

LONGER TO CONSUME
REQUESTED CONTENT

WHY DID THE CONSUMPTION GAP GROW?

As registrations increase, so does the time to consume.

Ultimately, the widening of the Consumption Gap for 2023 comes down to some very real issues:

1 CONTENT IS BEING REVIEWED BY MORE PEOPLE.

59% of B2B buyers have at least four people involved in their buying committee.

25% have at least seven people. While collaborative efforts signify a healthy organization, multiple rounds of vetting can delay work, underscoring the importance for marketers to tailor content strategies to the complex decision-making ecosystems of their audiences.

2 THE URGENCY TO PROVE ROI MORE SWIFTLY.

Present economic conditions necessitate a balance between immediate needs and future gains.

Ultimately, it requires a strategic shift in content creation and distribution to focus on clear, measurable outcomes that align with business goals that address both ROI concerns and timelines.

3 PROFESSIONALS ARE BEING ASKED TO DO MORE WITH LESS.

More work, less time/resources, same expectations.

Marketers and sellers must leverage tools and strategies that maximize impact without adding to the already high demands on their audience's time and attention.

Have patience with your prospects. Unless they've specifically requested to hear from you, give them time and space to consume your content.

PRO TIP: Close the Consumption Gap with content that your buyers are actively looking for. Discover your buyer's interests in our [2024 Content Trends & Planning Guide >>](#)

CONSUMPTION CALLOUTS

17 HOURS

From registration to download was the fastest consumption rate. SVPs were the hungriest.

9% DECREASE

In consumption rate of professionals within organizations 50k+ employees. However, they still consumed content 6% faster than the average professional.

32% INCREASE

In consumption rate of professionals within the Automotive Industry, averaging at 21.5 hours.

THE TITANS OF TECH

As usual, all things technology-related accounted for the largest share of audience registration across each Job and Industry category.

THE TOP 10 ACTIVE INDUSTRIES

The IT Industry was the most active, representing 18% of total audience.

Total registrations grew 20.8% YOY.

BY THE JOB LEVEL

THE TOP 10 JOB LEVELS

■ 2023 ■ 2022

Individual Contributors were the most active Job Level, representing 31.2% of total audience, with this group's registrations growing 20.7%. Manager, Director, and C-Level Job Levels saw their total registrations grow by an average of 7.9%. However, their total audience share dropped by an average of 6%.

Historically, these three Job Levels have been the drivers of consumption. To see all three "dip" YOY is quite interesting. It's possible that this drop could be due to mass layoffs, specifically within the tech industry.

AI: ABSOLUTELY INTERESTED

2023 was the year AI went mainstream, thanks in large part to OpenAI's ChatGPT.

During this period of exponential growth, our assumption was that B2B consumption behaviors would change alongside it, thus validating that this is a point of no-return.

That is indeed the case.

THE TOTAL AI CONTENT DEMAND

5.5X
INCREASE IN DEMAND
FOR AI CONTENT

After years of see-sawing, demand for AI content exploded in 2023, increasing 5.5x YOY.

- Marketers, Journalists and HR professionals were more likely to consume ChatGPT-related content.
- Healthcare professionals, collectively, had the highest percentage of users consuming Natural Language Processing (NLP) related content.

AI topic registrations for 2024 have already eclipsed the totals for 2018-2020, and are currently pacing to finish the year up 1.9x from 2023.

The world will not *be* changing. The world *has* changed.

Our 2023 Report did not feature any AI insights. At time of publication, we were just beginning to track the explosion of demand within this new market opportunity.

This will continue to be an area of strategic focus for NetLine in 2024.

ANALYZE YOUR **TARGET BUYERS**

As much as we would love to cover each and every audience, we simply can't do it.

Fortunately, you can uncover exactly what your prospects are consuming right now with our free, interactive tool, Audience Explorer.

Audience Explorer allows you to break down audience content consumption by Job Area and Industry—as well filtering options by Region, Company Size, and Job Level—with real-time data from the past 180 days.

Start Exploring your ICP Today.

INTENT FINDINGS

Knowing what could happen next is a superpower.

It's like having the answers to a test or knowing precisely how an opponent plans to move.

While it may not be a cure-all, intent data—specifically buyer-level intent data—is the closest thing we have to tangibly understanding WHO our prospects and future buyers are.

It also helps us identify what they want and when they want it.

With the introduction of **INTENTIVE**—the only buyer-level intent platform delivering real-time insights into “who” is actively expressing intent in an account (as well as “what”, “when”, and “where”)—NetLine now has access to billions of intent-rich data points that provide insight into the future behaviors of B2B buyers.

Let's review what INTENTIVE has discovered.

PURCHASE READINESS INCREASED

Despite economic turmoil, B2B organizations continue to spend in areas in which they deem valuable.

A mid-year report from The Winterberry Group projected that B2B advertising and marketing spend was forecasted to be \$53.7B in 2023—an increase from \$49.9B in 2022.

This might explain why 35% of B2B buyers showed a greater likelihood of purchase intent over the next 12 months, up from 33% in 2022.

	Under 3 Months	3-6 Months	6-12 Months	Over 1 Year
2022	8.8%	10.0%	14.5%	66.7%
2023	9.4%	8.8%	17.0%	64.8%
Delta	6.8%	-12.0%	17.2%	-2.8%

RESPONDENTS WERE

12%

LESS LIKELY TO INVEST IN 3-6 MONTHS, YOY

WHO IS READY TO BUY?

Percentages are nice but they don't tell us the story about the people.

Who across the B2B landscape is most likely to make an immediate buying decision?

JOB LEVELS

More Likely Associated with Immediate Buying Decision	Less Likely Associated with Immediate Buying Decision
C-Level	Supervisor
Executive VP	Senior Employee
Owner	Senior Manager
Individual Contributor	Director
Senior VP	Manager

The C-Suite and Senior leadership were the most likely to be aggressive. Middle management and senior employees were more reserved.

JOB AREAS

More Likely Associated with Immediate Buying Decision	Less Likely Associated with Immediate Buying Decision
Quality Assurance/Safety	Banking/Mortgage
Logistics/Transportation	Customer Support/Client Services
Manufacturing/Production/Operations	Engineering
Human Resources	Education
Sales	Medical and Health

The nature of these roles speak to the needs for each:

- Sales and Manufacturing/Production/Operations, for example, want and need solutions immediately.
- Professionals in the Education and Engineering space, for example, are associated with planning ahead, allowing more time for consideration.

INDUSTRIES

<i>More Likely Associated with Immediate Buying Decision</i>	<i>Less Likely Associated with Immediate Buying Decision</i>
Biotech and Pharmaceuticals	Education
Retail and Consumer Goods	Non-Profit/Organizations
Utility/Energy	Insurance
Advertising/Marketing	Transportation and Logistics
Real Estate	Government

Real Estate and CPG professionals live in a, “what have you done for me lately?” world where inflation and interest rates are also a major factor.

NPOs and Government professionals ponder every decision and often take considerable time before arriving at any result.

The Relationship Between the Buyer’s Journey and Content Format

There is a clear connection between a user’s choice in format and their readiness to buy.

Based on our first-party buyer-level intent data, we categorized 12 unique content formats with two Immediate Buying Decision Association distinctions: More Likely and Less Likely.

CONTENT FORMATS

More Likely Associated with a Buying Decision	Less Likely Associated with a Buying Decision
Playbook	Tips & Tricks Guide
Case Study	Course
Trend Report	eKit
Analyst Report	Report
White Paper	Article
Live Webinar	Cheat Sheets

PLAYBOOKS, CASE STUDIES, AND TREND REPORTS

were the three formats **most** likely to be associated with a buying decision over the course of the next year.

Users requesting these formats are seeking tangible ways to action a product or service in an optimal fashion and to study how their peers have had success.

TIPS AND TRICKS GUIDES, COURSES, AND EKITS

were the three formats **least** likely to be associated with a buying decision over the course of the next year.

Users requesting these formats are looking to begin with the basics or refresh their knowledge.

CONTENT FORMATS

<i>More Likely Associated with a Buying Decision in Under 3 Months</i>	<i>More Likely Associated with a Buying Decision in 3 - 6 Months</i>
Guide	Playbook
Live Webinar	Trend Report
Best Practices	Case Study
White Paper	Special Report
Live Virtual Event	White Paper
Checklist	Live Webinar

From these findings, four insights stood out from the rest:

GUIDES

47%

More likely to Purchase in 0-3 Months compared to other formats

WHITE PAPERS

13%

More likely to purchase in 0-3 Months compared to eBooks

PLAYBOOKS

62%

Less likely to purchase in 0-3 months, despite being the top format

HOWEVER, PLAYBOOKS

6x

More likely to purchase in the next 3-6 months.

FORMAT FINDINGS

We've learned how content formats can signal different levels of purchase intent. But what else can format trends teach us about B2B buyers?

THE TOP 10 CONTENT FORMATS

EBOOKS WERE KING ONCE AGAIN, WITH GUIDES AND WHITE PAPERS DECLINING IN TOTAL DEMAND.

eBooks were 3x and 5.8x more likely to be requested compared to Guides and White Papers, respectively.

Guides, after increasing in demand by 75% in 2022, fell 14.9% YOY.

In the Top 10, only Research Reports saw a greater dropoff.

Cheat Sheets (21.5%), Tips and Tricks Guides (26.0%) and Book Summaries (43.1%) all saw increases.

This highlights the clear need for the majority of content (read: Top-of-Funnel content) to focus on delivering value as directly and efficiently as possible.

FORMAT FEATURES

15% DECREASE

CONSUMPTION PROBABILITY AND PURCHASE INTENT

NetLine has studied format consumption trends for the past eight years.

Our 2022 and 2023 reports highlighted the probability of purchase intent and how it relates to content format and other parameters.

THE PROGRESSION OF EBOOK CONSUMPTION

eBooks are the most popular format for B2B professionals. While there are many who will debate the semantics of eBooks, Guides, Reports, and White Papers, NetLine's data is clear: eBooks rule.

EBOOKS REPRESENTED

40%

**OF ALL DEMAND, WITH A YOY
INCREASE OF 34.5%**

eBooks are also linked to a greater likelihood of purchase within the next six months. For this format, getting a first date is quite easy. A second? Not so much.

Users who requested an eBook and go on to consume additional content consume a different format 96.4% of the time.

This is where things get fun.

This could mean that eBook consumption is more tightly aligned with purchase intent than previously believed. The truth is more complicated.

Users registering for eBooks were most likely to progress to:

Each of these formats were less likely to be associated with a buying decision in the next 12 months.

While users registering for eBooks were most likely to progress to Courses, this progression is not unique to this content format.

In fact, users registering for one of the seven most requested formats are most likely to progress to Courses following their initial registration.

What's evident immediately is the popularity of Courses as a secondary format following initial consumption.

A remarkable feat for the 26th most requested content format overall.

TYING IT BACK TO PURCHASE INTENT

Even as we expanded our analysis to the top 25 content formats of 2023, we found that, on average, there was an 18.8% chance that a user would next register for a Course, making it the most likely next step.

While Course registrations reside on the Content Formats Less Likely Associated with a Buying Decision, not all outcomes are made equal.

However, just because Courses are the most likely outcome, doesn't mean it's a dead-end in terms of intent.

On the previous chart, six of the 10 formats are associated with greater purchase intent. Four of those formats (White Papers, eBooks, Articles, and Guides) each feature sequences with Courses as the next most likely format request.

CONTENT FORMAT CONSUMPTION SEQUENCE

From	To	Probability of Progression
White Paper	Course	9.2%
eBook	Course	15.3%
Article	Course	19.8%
Guide	Course	20.8%

What you should take note of is the Probability Progression to this Format percentages. White Papers being at only 9.2% is indicative of users choosing other formats.

Of the users requesting White Papers, the most likely content formats they request next include Trend Reports, Live Virtual Events, Playbooks, and Webinars, all of which are associated with greater purchase intent.

VOLUME VS. HIGH VALUE CONTENT

Courses were popular as a second registration.

While the format isn't immediately associated with purchase intent, the format residing at the opposite end of the spectrum is.

On average, the probability of users requesting Case Studies as their second piece of content is only 0.1%.

Despite users choosing Case Studies last out of a group of 25 choices, it represents one of the richest intent signals possible.

Users requesting Case Studies were 78.5% more likely to make a purchase decision in the next 12 months, second only to users requesting Playbooks (115.3% more likely).

While volume may not be there, interested prospects certainly are.

**USERS REQUESTING
CASE STUDIES WERE**

79%

**MORE LIKELY TO PURCHASE
WITHIN 12 MONTHS**

**USERS REQUESTING
PLAYBOOKS WERE**

115%

**MORE LIKELY TO PURCHASE
WITHIN 12 MONTHS**

INTENT SEQUENCES

NetLine’s INTENTIVE has demonstrated that B2B marketers cannot rely on a single datapoint to determine a user’s intention.

The more high-intent registrations your team sees across your marketing the better.

CONTENT FORMAT INTENT MATRIX

A user requesting and consuming high-intent content formats and taking additional actions is a tremendous sign of a buyer's true intentions.

To further demonstrate this, we revisit our exploration of eBook registrations. These requests were associated with late stage purchase behavior in the next 3-6 months.

For this reason, we reviewed the probability of users progressing to one of these formats.

USER PROGRESSION FROM EBOOKS

More Likely to Be Associated with a Buying Decision in 3-6 Months	Probability of Users Progressing to this format from eBooks
eBook	3.6%
Trend Report	1.7%
Live Virtual Event	1.3%
Live Webinar	0.8%
Playbook	0.6%
Guide	0.6%
Special Report	0.5%
Research Report	0.3%
Case Study	0.1%
White Paper	0.1%

Sans eBook to eBook progression, users who requested an eBook and go on to consume additional content are more likely to register for Trend Reports, Live Virtual Events, and Live Webinars.

Therefore, it can be assumed that users progressing from eBooks to Trend Reports, Live Webinars, or Live Virtual Events demonstrate significantly stronger purchase intent signals than users registering for one of these formats alone.

WRAPPING UP A YEAR OF CONSUMPTION

GATED CONTENT ISN'T DEAD.

Any report telling you users shy away from gates is unsubstantiated. You're leaving irreplaceable intent signals on the table without gating some of your content. NetLine has seen a 77% increase in demand for gated content since 2019. 2025's edition will feature even more astounding consumption figures.

PATIENCE IS A VIRTUE.

Your prospects need time: Time to consume, time to digest, and time to discuss with their colleagues. Unless they have requested a meeting, assume they are not ready to buy quite yet.

INCREASED BUYER READINESS.

Buyers are more likely to invest within the next year. To keep buyers progressing, be sure your content library includes formats that span across the Buying Decision Spectrum.

KEY DECISION MAKERS IDENTIFIED.

C-Level and Sales job roles are crucial in immediate buying decisions. But they're not the only ones who factor into these outcomes. Consider the types of detail and information each of these professionals needs to make an individual and collective verdict.

AI WILL LIKELY INCREASE CONTENT CONSUMPTION.

Demand for AI-focused content has already blown 2024's registration figures out of the water. We already know this, but we are only scratching the surface of what these tools can offer us. Prepare yourselves to master them and you'll be rewarded with outstanding outputs.

ABOUT **NETLINE**

NetLine empowers B2B marketers to scale revenue via an all-in-one buyer engagement platform that delivers unparalleled buyer-level intent data and lead generation capabilities.

Operating the only buyer-level intent platform, INTENTIVE, delivering real-time insights into “who” is actively expressing intent in an account, “what” actions that person is taking, “when” those actions took place, and uniquely “where” those actions occurred, including offline Event Intent data, NetLine fast tracks buyer transparency.

In addition, NetLine also operates the largest B2B content-centric lead generation platform offering content syndication, lead generation, account-based marketing, lead management, and more. Founded in 1994, NetLine is a part of Informa Tech, a leading provider of market insight and market access to the global technology industry.

Successful B2B Marketers Start with NetLine. Visit www.netline.com.

OUR COMMITMENT **TO YOU**

As the #1 B2B Buyer Engagement Platform, we feel that it is important to share with you how we do business. NetLine operates according to five core values: innovation, teamwork, integrity, customer satisfaction and accountability. Our advanced technology and massive scale are uniquely positioned to achieve the results Marketers are looking for. NetLine’s performance-based Portal and our dedicated team of experienced lead generation experts ensure that you will only pay for leads that meet your assigned campaign criteria—nothing less. Expand your footprint and competitive market share.
